DETAILED ACTION

Response to Amendment

1. The Amendment after Non-Final Rejection filed on 02/17/2009 has been received and made of record. Claims 1 and 3-26 are pending in the application.

Allowable Subject Matter

2. The following is an examiner's statement of reasons for allowance:

As to independent claim 1, the prior art does not teach or fairly suggest a print system having a printer controlling device and a printer, which performs printing on the basis of print data including a plurality of data segments inputted from said printer controlling device, said print system comprising: first communication means and second communication means wherein said first communication means is automatically turned off after said predetermined data segment is transferred from said printer controlling device to said printer, and said first communication means remains turned off while the other data segment is being transferred from said printer controlling device to said printer using said second communication means, and in combination with other elements.

As to independent claim 9, the prior art does not teach or fairly suggest a printer for receiving data, which includes image data and print-setting data, and for printing an image on the basis of said print data, said printer comprising: first communication means and second communication means, wherein the first communication means is automatically turned off after said image data is received, and said first communication means remains turned off

Art Unit: 2622

while the second communication means receives said print-setting data, and in combination with other elements.

As to independent claim 13, the prior art does not teach or fairly suggest a printer controlling device for transferring print data, which includes image data and print-setting data, to a printer, said printer controlling device comprising: first communication means and second communication means wherein the first communication means is automatically turned off after said image data is transferred, and said first communication means remains turned off while the second communication means transfers said print-setting data, and in combination with other elements.

As to claims 3-8, 10-12, and 14-26, these claims are dependent upon allowable independent claims and are thus also considered allowable over the prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
